TECHNICAL DATA SHEET

FORESTRY WINCH

Professional forestry winch equipped with disc brake: a safe system that requires no maintenance (self-locking). The brake retains any weight at 100% in any working condition: the more heavy the load the more the self-locking effect of the brake will increase. The brake opens easily even at full load, completely or partially. The unique "Dead Man" security system guarantees maximum safety and complies with international safety standards. Leaving the clutch rope free (manual) the brake is activated automatically. The rope can always be easily unwound from the drum. The forestry winch is built entirely of high quality steel, resulting robust and lightweight at the same time.

TECHNICAL DATA			
(A) Larghezza - Width	55 in	Wire rope length	164 ft
(B) Altezza - Height	60 in	∅ Wire rope	0,40 in
(C) Profondità - Depth	24 in	Speed	1,1-2,2 mph
Disc brake	standard	Commands	Manuals
Tractive power	3,3 / 5,5 US ton	Weight	661 lbs
