HSL Series Flexibility meets power

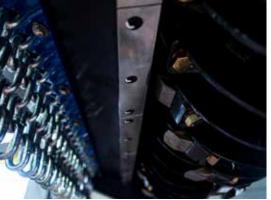

Class-Leading Standard Features:

- Heavy-duty, low-profile frame incorporates high-strength steel, full-strength welds for durability.
- The boxed-in design provides better rigidity and maneuverability for smaller skid steers.
- Easily replaceable wear parts ensure longevity and low cost of ownership.
- Powerful and efficient variable torque piston motor.
- Equipped with Promac's proven next generation Chip Production Rotor (CPR) that offers 60" of cutting width at just 2200 lbs.
- Suitable for a standard flow skid steer.
- Adaptable to smaller excavators.

CLASS-LEADING QUALITY FOR SERIOUS MULCHING:

- Variable Torque bent axis piston motor with the Promac Automatic Torque Controller (ATC)
- Suitable for standard flow; compact track loaders ranging from 70-95 hp with 20-35 gpm at 3500-4000 psi max.
- Available excavator mount adapter to permit use with 12 - 14 ton excavators
- Multiple tooling options to suit the working conditions and desired end product

ROBUST CONSTRUCTION AND MATERIALS:

• Fully welded, 100 ksi high strength steel frame and tool holders.

DESIGNED FOR LONGEVITY AND LOW MAINTENANCE COST:

- Replaceable wear liner made of AR400 plate
- Replaceable, skid shoes made of 3%" AR400 wear plate.
- Replaceable, bolt-in rear anvil made of AR400 segmented into 12" sections for selective replacement.

SAFETY IS OUR PRIORITY:

 Available Promac Drum Brake System solves the problem of ineffective brakes experienced by other manufacturers. The HSL 60 drum comes to a full stop in about 20 seconds without interfering with mulching.

^{*} specifications subject to change without notice

SPECS	Cut width	Approx. weight (lbs)	Motor size (cc)	Motor type	Flow pressure (PSI)	Tooling type	Tooling number	Flow min (GPM)
HSL 60	60"	2200	55 Variable Standard 75 Variable Available	Bent axis piston with variable displacement	3500 min 4000 max	Dual knives, carbides or beaver teeth	34	20-35

BEAVER TEETHWorks for most conditions

DOUBLE CARBIDESBest for rocky conditions

ROTATABLE KNIVESBest for sand or soil conditions
